

# Dockabl Shared TODO App for Task Round

---

## Technology Used

- Backend Language: PHP
- Database: MYSQL
- Hosting: AWS EC2
- SCM: Github

## Slack Integration

- Workspace Link: [dockabltodo.slack.com](https://dockabltodo.slack.com)
- Worksapce: dockabl\_todo
- App: TODO

## Features/Slash Commands

- **/listtodos**: Display all the open tasks in specific channel. Accepts no argument. On success, it provides an interactive message with an action button. With Action button , specific task can be marked as completed.
- **/addtodo**: This command takes one argument and adds a task in App. It takes everything as a task's title after **/addtodo**.
- **/marktodo**: This command take one argument and mark a task as completed. It takes everything as a task's title after **/marktodo** and mark completed.
